

Table of Contents

1	Introduction	6
1.1	Overview	6
1.2	Purpose	6
1.3	Scope	7
1.4	Benefits	7
1.5	Objectives	7
1.6	Structure of this Guide	8
1.7	Key Concepts	9
2	Laboratory Computerized System Categorization	9
2.1	Selecting the Appropriate Categorization Scheme	9
2.2	Laboratory Computerized System Categories	10
3	Development Versus Implementation Life Cycle	14
3.1	Qualification or Validation	15
3.2	SDLC or System Implementation Life Cycle (SILC)	15
4	Specifications and Traceability	20
4.1	User Requirements Specification	20
4.2	Detailed Design Specification	22
4.3	Traceability	24
5	Risk Management Model	25
6	Supplier Assessment	33
7	Project Planning and Initiation	34
8	Validation Plan	36
9	Coding and Construction	38
10	Qualification, Testing, and Release	39
10.1	Testing Elements	40
10.2	Categories	42
10.3	Testing Principles	43
11	Validation Report	45
12	Configuration Management, Change Control, and Problem Reporting	46
12.1	Configuration Management	46
12.2	Change Control	47
12.3	Problem Reporting	48
12.4	Maintenance and Maintenance Log	49
12.5	Use Log	49

13	System Administration	50
14	Security	52
	14.1 System Security Considerations	52
15	Back Up, Archive, and Business Continuity Planning	55
	15.1 Backup and Restore	57
	15.2 Archival	58
16	Training	58
17	Periodic Review	59
18	Retirement	61
	18.1 System Retirement Plan	62
	18.2 System Retirement Report	64
19	Summary and Conclusions	65
