ISPE UK AFFILIATE ANNUAL SEMINAR: STRATFORD NOVEMBER 26th 2009
“SUCCESS THROUGH MANUFACTURING INNOVATION”
CALL FOR PAPERS & POSTERS

The ISPE Central Region is organising the 2009 Annual Seminar on behalf of the ISPE UK Affiliate which will take place at the Holiday Inn in Stratford-upon-Avon, Warwickshire, on Thursday November 26th 2009. This seminar is intended to provide an opportunity to showcase a wide range of innovative designs, techniques and processes etc. developed and being developed which have the potential to provide beneficial impact to the development, and manufacture of pharmaceutical products. Papers and posters relating to case studies and manufacturing experiences are particularly welcome.

This event is an opportunity to extend understanding, debate and identify further opportunities for the innovative approaches being applied or developed by technologists and professionals supporting the UK and Global Pharmaceutical Industries.

This call for papers and posters is open to all professionals and academics involved in the pharmaceutical industry and allied services.

Background:

The seminar is to be held during the day of the ISPE UK Affiliate's Annual Awards Dinner. A large number of the seminar attendees also attend the Awards Dinner. In previous years typically 100+ people have subscribed to the seminar and it is seen as the UK Affiliate's "Flagship" Annual Seminar.

The seminar will be opened by 2 Keynote Speakers. The first Keynote Address will be given by Allyson Reed, Strategy and Communications Director of the UK Government's Technology Strategy Board within the Department of Innovation, Universities and Skills. It is hoped a second Keynote address will be given by a senior director from a Global Pharmaceutical Manufacturing Company.

All reasonable expenses incurred by speakers in attending the event will be covered by ISPE.

ISPE UK AFFILIATE ANNUAL SEMINAR: STRATFORD NOVEMBER 26th 2009
“SUCCESS THROUGH MANUFACTURING INNOVATION”
CALL FOR PAPERS & POSTERS

Target Audience:

- Those who want to understand more about the current and future developments in the industry and to be inspired by the innovative success of the speakers
- Those who are concerned and responsible for the introduction of innovative developments aimed at keeping the UK pharmaceutical industry at the forefront.
- These will include senior engineering and technical managers and directors from pharmaceutical manufacturing companies, suppliers, consultants, contractors, sub-contractors and academics and ISPE members in general.

Topics

Papers and posters are requested from industry and allied services professionals and academics. These papers will highlight and emphasise innovative approaches that have been developed or are being developed which have the potential to lead to an improvement and success in existing or new pharmaceutical manufacturing techniques, processes and ways of working. Success can be demonstrated in a wide variety of ways such as efficiency, improved quality, improved safety and environmental performance etc.

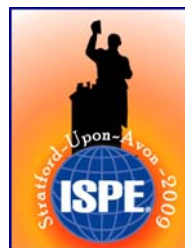

The following topics of interest, which are applicable to all of the industry's fields; R&D, API, Secondary, Biopharm, Drug Delivery etc. are for guidance but are not meant to be exhaustive:

- Process Innovation
- Facility Design and Construction
- Process Design
- Construction
- Lean Applications
- Product Design
- Technology
- Drug Delivery
- R&D & Science
- Knowledge Management
- Quality by Design
- Continuous Processing
